## George W Bush is to blame for....

**Palestine** – George Bush fails to condemn the brutal occupation and repression carried out by Israeli troops. Ariel Sharon can commit his war crimes against Palestinian people safe in the knowledge that US aid to Israel will continue.

**Climate Change** - The Kyoto treaty set a target of a 5 percent cut in world carbon emissions. The treaty was signed by 150 nations, but has failed to be ratified largely due to opposition from the Bush administration.

**Iraq** - the occupation continues to create death, horror and hardship for the Iraqi people, with no democracy in sight. Bush has said he will need an extra \$87 billion to pay for the occupation. He is also prepared to pay with the lives of American soldiers

**All of the above and more .....**

George W Bush is visiting the UK from 19<sup>th</sup> - 21<sup>st</sup> Nov at our expense. Tony Blair hopes to do him a favour by inviting him to London and providing him with statesmanlike images to send back home and launch his re-election campaign. We can ensure that a very different picture is broadcast across the world – one of mass protest. Weds 19<sup>th</sup> Nov is a national day of civil disobedience against the Bush Visit.

**Join the ResistBush protest**

**Weds 19<sup>th</sup> Nov - assemble 3pm Victoria Station**

*resistbush is an umbrella network of groups organising NVDA during the Bush visit. For details of NVDA training workshops and legal support see [www.resistbush.org](http://www.resistbush.org)*
